ABOUT OUR COMPANY

iKantam is a mobile, web application and e-commerce development company with main headquarters in Minsk, Belarus (Europe) and a staff from top local universities. Our team helps business owners & entrepreneurs implement their vision by utilizing strong business experience, technical skills, and creative ideas.

Together with our wide range of customers that include startups, marketing agencies, IT consultancies, and established businesses, we define top project priorities that are most suitable for each client. This includes time to market strategies (minimum viable product), and cost cutting initiatives with a bug free focus. We also emphasize the most efficient ways to accomplish these projects to save your time and money. In our portfolio, we have many successful startups that were launched in the US and European markets including advanced web and mobile solutions built for existing businesses in Healthcare, Finance, Marketing and many other industries. We have also launched popular online stores and marketplaces that operate throughout the US.

Additionally, we implement our own products in Social Media Marketing and e-commerce. This allows us to better understand the unique issues and pain-points in each of these business verticals and enables us to prevent future problems facing our clients.

EXPERIENCE

SKILLS

IDEAS

WEB APPLICATION DEVELOPMENT

WE USE THE MOST COMMON AND ESTABLISHED TECHNOLOGIES

Whether you are a young startup or an established business, our team is ready to help you create a fully customized solution and to provide continuous tech support.

We use established and recognizable technologies and techniques to ensure top quality and scalability of the final product. We also offer coverage of the code with automated testing which reduces the number of bugs, helping bring projects to market more efficiently. Our skilled and experienced certified engineers will guarantee a successful result.

How do we differ from competition? We are not just coders; we are also your mentors and partners. We have numerous success stories launching US/European startups, as well as many accomplishments aiding large companies in their continued development. This allows us to provide advice, propose better solutions and use more effective approaches for better results. Share your idea with us - we will find a way to make it happen!

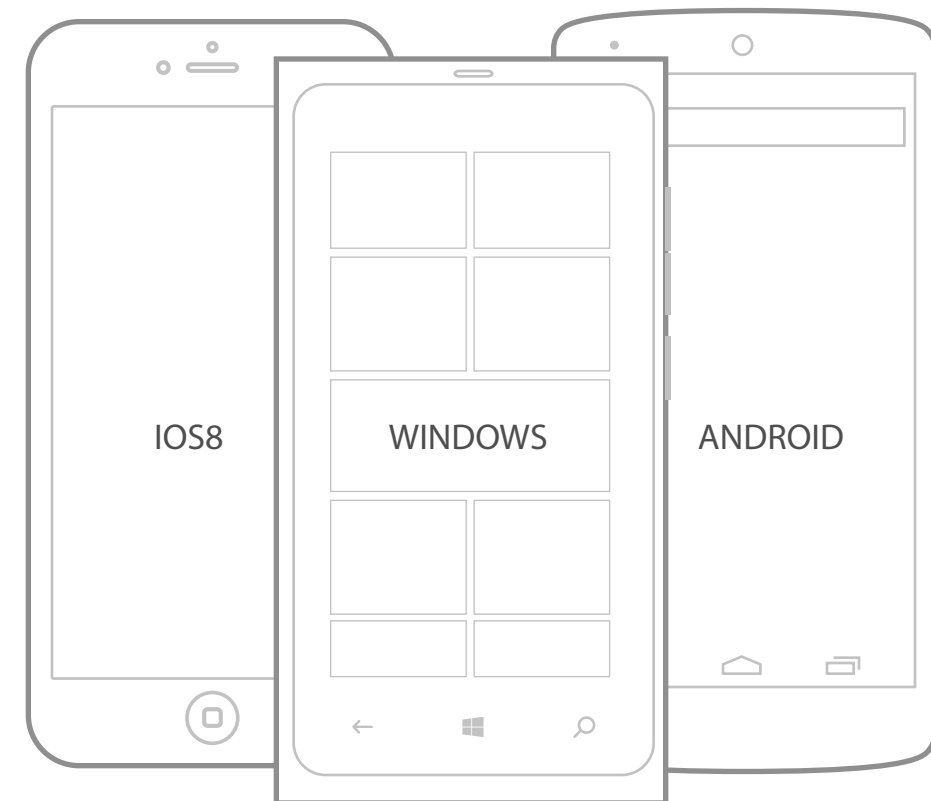

MOBILE APPLICATION DEVELOPMENT

iKantam is the right choice if you want to launch a new mobile application or add a mobile app to an existing web solution. We work with the most ubiquitous mobile platforms such as iOS, Android and Windows. We also develop cross-platform mobile solutions using PhoneGap or similar frameworks.

We are experienced in high-load mobile projects which allows us to design the most effective and secure back-end infrastructure that can be scaled as the project grows.

In our portfolio, you will find advanced ecommerce mobile application with reservation and scheduling functionality, online ticket sales & events solutions, city guides, smart home mobile application and much more. Our skilled team of UI designers and Engineers can deliver the most effective product based on your idea or specification. Your business success is our goal!

WE WORK WITH ALL COMMON
MOBILE PLATFORMS

E-COMMERCE DEVELOPMENT

Magento is a leading eCommerce platform. More than 250,000 merchants worldwide put their trust in Magento's eCommerce software. Stand out from the crowd with an enterprise-level commerce solution tailored to fit your needs.

iKantam is an official Magento solution provider contributing free and premium extensions to the Magento Connect marketplace. We have an in-house team of Certified Magento developers with extensive experience completing custom Magento e-commerce projects of varied complexity.

IKANTAM IS THE OFFICIAL MAGENTO

TESTIMONIALS

“Ikantam is absolutely the best! I would highly recommend them for any work. The team is very smart, creative, and full of great ideas. If you're looking for a team to do more than just execute exact requirements and rather help you develop requirements given their expertise in the e-commerce space then this is the team for you! Of course their execution is beyond excellent too. So all in all I'm a very satisfied client!”

I had a great experience working with iKantam. It's an absolutely awesome vendor. They helped me to finalize the alpha version of my startup project with a little delay but within budget and overall good quality. I recommend them to you

Michael Yevdokimov / [Mediaprojects.biz](#)

This is my third project with iKantam and they are just outstanding. We continue to work together as they provide constant support for the projects they have created for me.

Mike / [Entrepreneur](#)

I have worked with Paul and iKantam for almost a year now. Prior to working with them I either used my inhouse staff for simple projects or outsourced more difficult tasks to workers in India. After numerous dissapointments, I found iKantam via a friend and have used Paul and iKantam on 5 different projects each requiring different applications and technology. On each occasion I found Paul and his team more than up to the tasks set by me, and the end result far exceeded my expectations

To Whom It May Concern: Working with Ikantam was a refreshing experience after we have tried several contractors. The overall impression was very positive: the communication was 100% clear, the budget was met, the work was done on a high level and minor discrepancies (which are inevitable in any kind of contract) were resolved quickly, professionally and in a good spirit. We are definitely recommending Ikantam to others and are planning to use them in our coming web projects
